

INT. LIBRARY

DR.RUBY VINCENT, is a scientist and trained spy officer, who works for a secret agent group which is one of the best in the U.S. She investigates new and interesting cases each day and goes out to solve them as well.

NATASHA, is the manager and head of the secret agency. She is also the first female manager at the agency which makes her a very special person in her community of secret agents. She is also DR.RUBY VINCENT's boss and directs new missions.

DR.RUBY VINCENT, enters the office and goes to the meeting room.

DR.RUBY VINCENT

What happened? Why are you staring at me like that?

NATASHA

Because you are late!

DR.RUBY VINCENT

Well I am sorry I was researching something important so I got late.

NATASHA

Yes, an hour late!

DR.RUBY VINCENT

Ok, look I am sorry.

NATASHA

(rolls her eyes and sighs) Well I have something important to discuss with you. Take a seat

Dr. Ruby takes a seat and gets out her binder and a pencil.

DR.RUBY VINCENT

Go ahead. I am listening

NATASHA

We have a new mission. You have probably heard the news about how people are suddenly dying for unusual reasons. Like that lady who was found in her back yard dead a few days ago. She was living a normal life and even when the forensics searched her house and her background history, they

couldn't figure what caused her death.
I need you to research all these
unusual deaths and try to find if
there is a killer and who it might.

DR.RUBY VINCENT

I have heard about this recently and
in fact I was researching about this
before the meeting. That's why I got
late.

NATASHA

Great! I need some research in by
today and tomorrow and we will have a
meeting tomorrow during lunch. This
mission needs to be confidential so
don't share anything about it with
anyone.

DR.RUBY VINCENT

Got it. I will get right to work.

INT. IN THE LAB(SCIENCE CLASSROOM) AFTERNOON

DR.RUBY VINCENT uses her testing machines to start her
research on the investigation. She tries to find all the
background information about the unusual deaths in the city
and researches more about the history of the people who died.

DR.JASMINE, another scientist that works at the spy agency
walks into the research lab and greets Dr.Ruby.

DR.JASMINE

Hi how are you?

DR.RUBY VINCENT

I am good how are you?

DR.JASMINE

Good. What are you working on?

DR.RUBY VINCENT

I just a got assigned to a new mission
today.

DR.JASMINE

Oh nice! What is it about?

DR.RUBY VINCENT

I can't share anything about it since
it is confidential. Sorry. (pause)

What are you working on?

DR.JASMINE

Oh just compiling all the evidence from our last mission and storing it away now that it is over.

DR.RUBY VINCENT

Oh ok. Do you mind if I take a look at the evidence we collected?

DR.JASMINE

Sure! I mean you found most of it anyway

DR.RUBY VINCENT

Thanks!

DR.RUBY VINCENT takes the evidence folder and opens it. She finds evidence from her last mission which involved a murder of a young teen named Andy. Ruby starts looking through a stack of papers when she gasps.

DR.JASMINE

What happened? Is something wrong?

DR.RUBY VINCENT

How could we have missed that? (she mumbles)

DR.JASMINE

What happened? What did we miss?

DR.RUBY VINCENT

Look at this picture. (show insert)
This a picture of where she was murdered.

DR.JASMINE

And what about it?

DR.RUBY VINCENT

Look at the reflection through the computer. This picture was taken after her death but you can see her standing far away with something in her hand.

DR.JASMINE

Oh my goodness! How did we miss that?

DR.RUBY VINCENT

We need to go and talk to Natasha because this case could be related to the new mission we are working on.

DR.JASMINE

Yes, let's go!

INT. LIBRARY

Dr.Ruby and Dr.Jasmine see Natasha is still in the meeting room and enter in quietly.

NATASHA

Hi, is something wrong? (suspiciously)

Dr.Ruby and Dr.Jasmine stare at each other and Dr.Ruby starts talking.

DR.RUBY VINCENT

We just noticed something very shocking from our last mission. While I was researching for our new mission, Jasmine came and she was putting away evidence from our last mission and I asked her if I could look through it.

NATASHA

And?

DR.JASMINE

Well Ruby found something really important.

DR.RUBY VINCENT

While I was looking back at the evidence, I came across this picture. It was where Andy was murdered but it was taken after her death through the CCTV cameras near by. (pause) And I just noticed through this computer reflection that this is Andy from far away. She even has something in her hand.

NATASHA

What?? (very surprised) How could we have missed such an important piece or detail?

DR.JASMINE

We are not sure but we need to open up this mission again.

DR.RUBY VINCENT

Yes, and this might even be related to the new mission.

NATASHA

You are right. You guys need to look over this file again and I will put more officers in this mission to help you guys.

DR.JASMINE

Can I know what the new mission is so I can understand how these both missions could be related?

Natasha and Dr.Ruby stare at each other Natasha tells her everything. Dr.Jasmine is shocked and is starting to connect the dots.

NATASHA

You both will be working on both the missions together and I want information on both of them by this evening. I am going to go talk to the forensics lab.

DR.JASMINE

Forensics?

NATASHA

Yes, is something wrong with that?

DR.JASMINE

(looks nervously) Ummm I think the forensics won't be able to help.

DR.RUBY VINCENT

Why? (pause) Are you hiding something?

DR.JASMINE

No (she says angrily)

NATASHA

Jasmine what is wrong?

DR.JASMINE

I know Andy!!! (she screams)

NATASHA AND DR.RUBY

What???

DR.JASMINE

Yes, she is my cousin. And I can't let you guys continue with this mission so everything is going to end here.

NATASHA AND DR.RUBY

No. You can't be serious.

DR.JASMINE

Sorry! I have already planted a bomb.

The lights go out and the scene ends.
